# User Guide

Login Screen:

User can login to the application through this screen. Enter registered Username and password. Click on login button. If Username and password matches it takes you to the Search screen. If it cannot find credentials it throws a pop up showing error. Pop up can be closed by clicking 'X' or it automatically closes in 3 seconds.

If it is first time, then you can register by clicking on "New User? Click to Register button" .It takes you to the below screen.

Register Screen:

To register a new user, enter below details. User can register to the application by entering valid email id as Username, password and selecting their role and conference from drop down's. Click Register. If user is registered successfully it takes you to the Search screen (shown below). If user wants to return back to Login screen he/she can click on Login button.
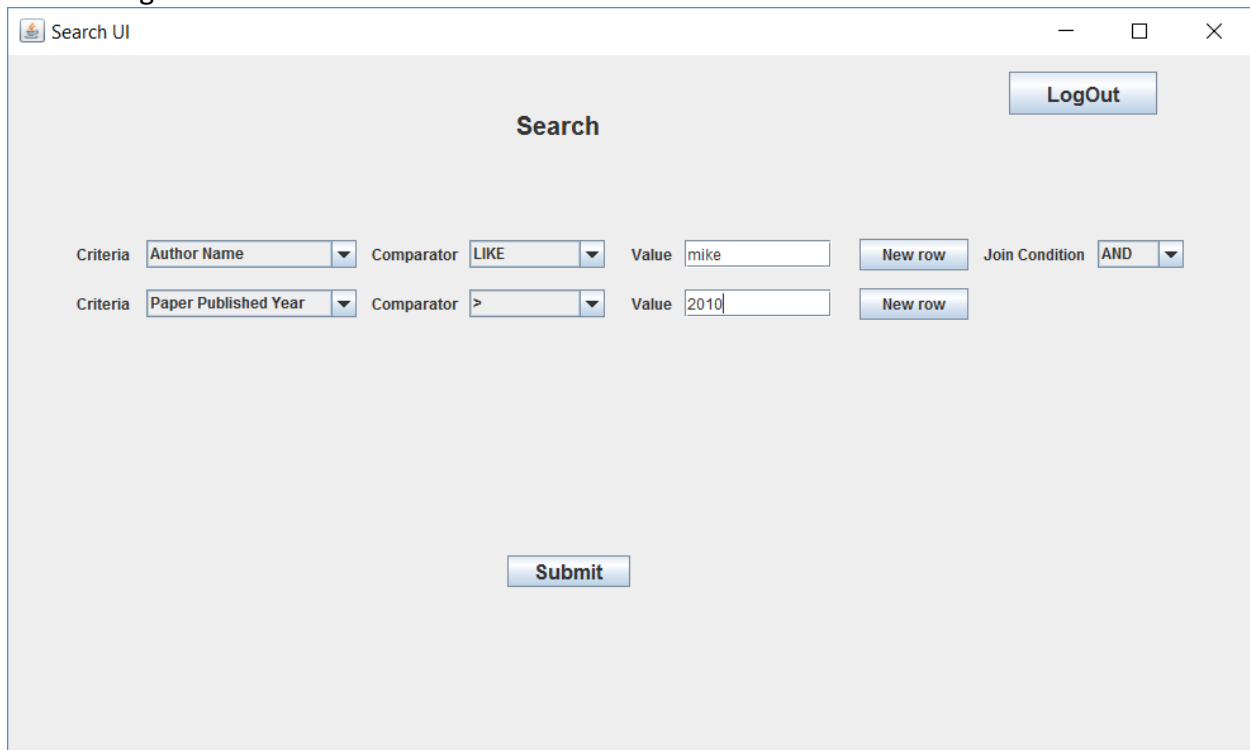

Search:

On Successful Login or Registration user will redirected to below Search screen. In this screen user can enter his search criteria. From Criteria drop down user can select criteria he wants to filter. Comparator is used to join the Criteria selected by user and the value he/she entered. If User wants to add multiple criteria he/she can click on new row button. On Clicking new row button it displays Join condition and another row to add criteria. Join condition is used specify how user wants to join two criteria's.

      If User doesn't enter a value in the text field or enters wrong type of value it throws an error pop up. Once User enters required criteria and clicks on Submit it fetches results matching the criteria and displays in the below screen. If search zero results it throws an error pop up asking user to widen the search criteria. If user want to logout from application he can click on logout button. Logout redirects back to Login screen.
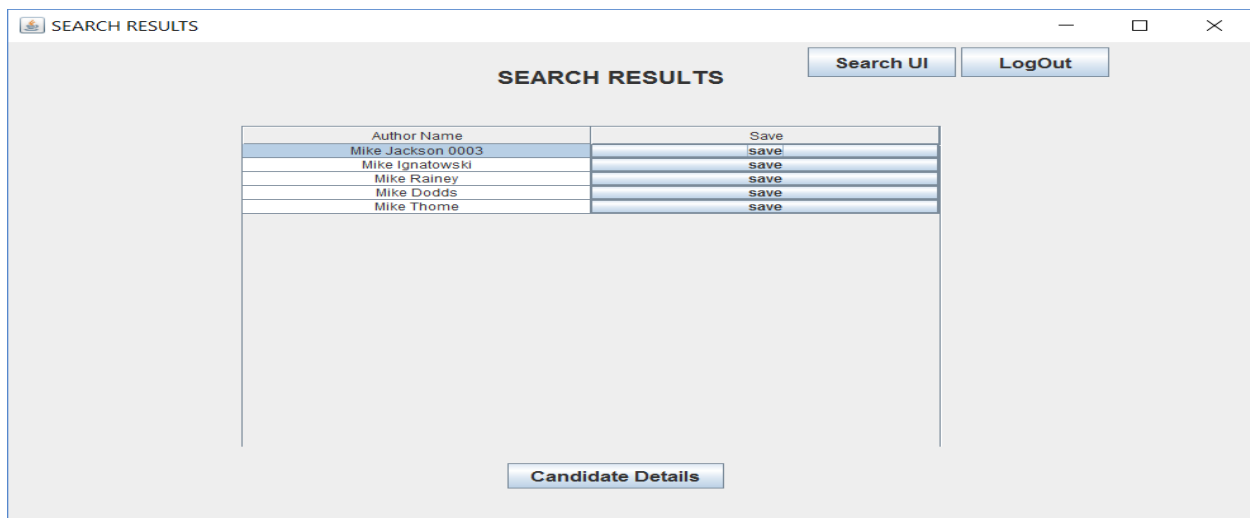

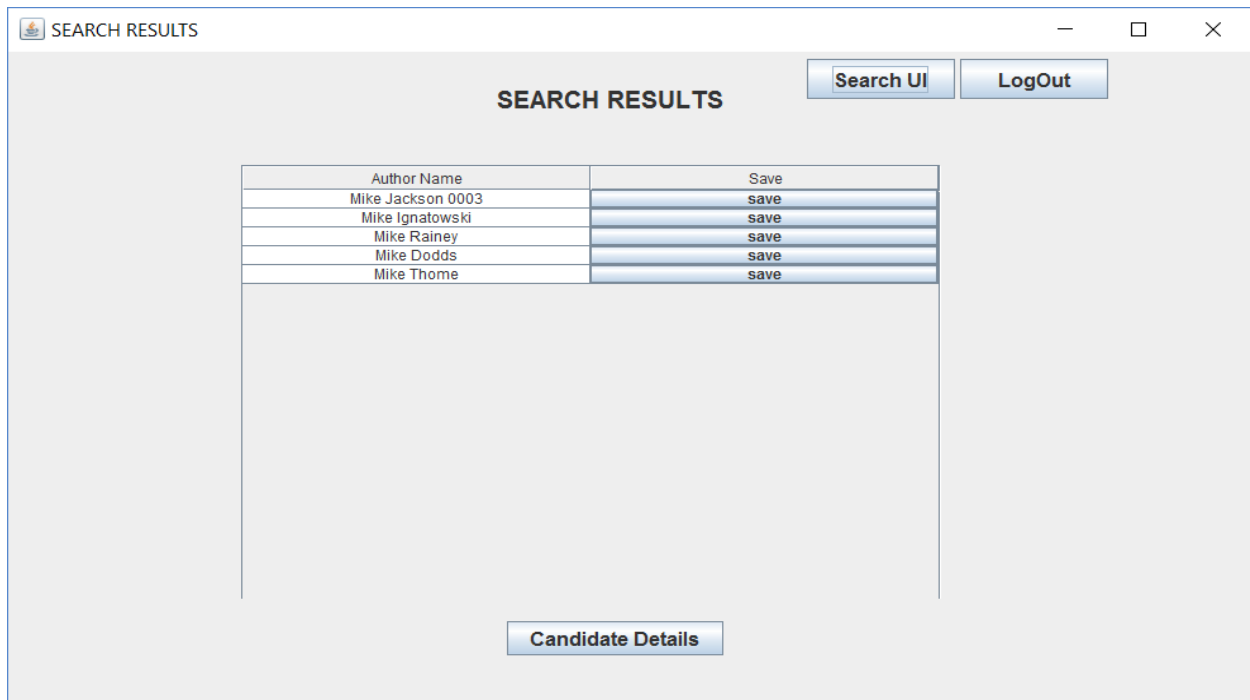

Search Results:

This screen displays the results of the search criteria entered in search screen. From this screen user can select candidates he wants to check further. He can click on save button beside the user he wants to consider. Once he is done he can click on Candidate Details which directs user to next screen with further details. If User clicks on Candidate Details without selecting any candidate it throws an error pop up. If User wants to go back to Search page he can click on SearchUI on top right corner. If he/she wants to logout he can click on logout button. Logout redirects back to Login screen.

Saved Authors:

Once User clicks on required candidates he is redirected to this screen which shows further details. In this screen user can select his preferred candidates. This list can be send to other users that belong to same conference as current user. Once user clicks on Send Email it throws a pop up after email has been sent. User can return back to Search screen by clicking on SearchUI button and logout by clicking on Logout button. Logout redirects back to Login screen.
